Hence the bug number, developer's name, and date of review are the positional parameters of the DeBugInfo class and the message is an optional or named parameter. The struct keyword is used for creating a structure. NET applications cross-platform, but also to bring better development tools for Linux developers.

Encapsulation is defined as the process of enclosing one or more items within a single unit. See our Returns Policy. Mikael Olsson is a professional web entrepreneur, programmer, and author. The book is packed with useful information and is a must-have for any C programmer. It specifies the types of items to which the attribute can be applied. The parameter presents the essential C syntax in a well-organized format that can be used as a handy reference.
